Wattwise Solutions LLC

Compact weather stations

WW-AIR-104 / WW-AIR-105 / WW-AIR-106

Compact weather instruments using ultrasonic sensing for wind speed and direction alongside temperature, humidity and atmospheric pressure measurements. Variant options add solar radiation or rainfall measurement. A corrosion-resistant metal housing and digital communication support integration with environmental monitoring and infrastructure observation systems.

Applications

• Environmental monitoring

• Wind energy

• Bridges and tunnels

• Urban observation

Technical data

Interface	RS485 / RS232 / Modbus / ASCII
Power supply	12–30 V / 0.5 W
Operating temperature	−40–80 °C
Protection rating	IP66

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
