Wattwise Solutions LLC

Portable Methane and NMHC Analyzer

WW-PRT-003

A portable analyzer for total hydrocarbons, methane and non methane hydrocarbons using flame ionization detection. A heated sample transfer path helps limit losses during field measurements. The catalog describes use on stationary emission sources and other exhaust measurements, with battery or adapter power for site operation.

Applications

• Stationary source testing

• Field hydrocarbon analysis

• Emission surveys

Technical data

Measurement method	FID
Measured parameters	CH4, NMHC, THC
Measurement range	0–30000 ppm
Weight	10 kg
Dimensions	413 × 251 × 348 mm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
