Wattwise Solutions LLC

Integrated automatic water monitoring station

WW-WAT-124

An integrated station combining water sampling, analytical instruments, data collection and remote transmission. It supports probe measurements and chemical analysis for a broader water quality program. Designed for unattended monitoring, the station tracks component operation and sends measurement data over a 4G connection.

Applications

• Surface water

• River discharge outlets

Technical data

Measured parameters	COD, NH4-N, TP, TN, pH, DO, SS, ORP
Interface	4G
Power supply	220 VAC
Operating temperature	0–50 °C
Dimensions	700 × 700 × 1600 mm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
